OPTIMIZE HOLDING CAPACITY

Specialized media and filter designs

THINK SIMPLE. THINK SMART.

THINK QUALITY.

## QUALITYSEAL FILTER

The QualitySeal from Quality Filters contains specialized media and filter designs which optimize particulate filtration, airflow increase and maximize energy utilization in each application.

### POLYESTER PADS AND ROLLS

- All high loft medias are multi denier blends which allow for high dust holding, superior paint holding and cost effective efficiency.
- A non-migrating tackifier is added which aids in trapping and holding dust in the media.

Cut Polyester Pads and Rolls

### POLYESTER RING PANEL AND LINKED PANEL FILTERS

- Media layers are graduated density for optimized dust loading and high energy efficiency.
- Engineered internal frame assures stability under high air velocity and heavy dirt loading.
- Airtight seal is created with our unique overlapping edge to prevent dust bypass. Our seal pattern improves filter life by preventing sagging and fluttering.
- Custom sized panels and media combinations are available.

Linked Panel Filter

### POLYESTER MULTI-POCKET CUBE FILTERS

- Offer up to five times the filter area of flat panels.
- Overlap on edges inhibits dust and paint bypass, and self-sealing wire support withstands warping.
- Best way to maximize the service life and efficiency of the polyester medias.
- Unique Q cube design is the most cost effective and efficient design on the market.
- HVAC or Paint Overspray collection.
- Aerospace systems available.
